

# CLAIRE — Technique Candidates

Run date: 2026-06-02

---

Cross-platform workflow techniques surfaced this cycle. Test manually before considering any configuration change.

## 1. Persistent System Prompt via Project Instructions [HIGH]

Users paste a detailed, reusable prompt into a project-level 'instructions' or 'system prompt' field so every conversation in that project automatically inherits the context, role, and constraints without re-entering them. This works across ChatGPT (custom instructions / GPT system prompt), Claude (project instructions), and similar tools.

**Source signal:** [/r/VAClaims/comments/1tk082g/steal\\_my\\_claude\\_prompt/](https://news.ycombinator.com/item?id=44549209), <https://news.ycombinator.com/item?id=44549209>, [/r/LocalLLaMA/comments/1tjbhjk/same\\_task\\_in\\_githubcopilot\\_pi\\_claudecode\\_and\\_opencode\\_with\\_qwen3\\_6\\_27b/](https://news.ycombinator.com/item?id=44549209)

*Test: Create a project in Claude or ChatGPT, paste a detailed role-and-rules prompt into the system/instructions field, then open a new chat inside that project and verify the AI behaves according to those instructions without any additional priming.*

## 2. Same-Task Multi-Model Comparison [HIGH]

Run the identical prompt or task through multiple AI models (or the same model inside different agentic harnesses) and compare outputs side-by-side to isolate what differences stem from the model versus the tooling/system-prompt wrapper. This reveals which tool adds the most value for a specific use case rather than relying on general reputation.

*Test: Take one concrete task you do regularly, submit the exact same prompt to Claude, ChatGPT, and one local model, then score outputs on your own rubric to decide which to use by default for that task type.*

## 3. Explicit Anti-Hallucination Constraint in Prompt [MEDIUM]

Adding a direct instruction such as 'do not invent information that does not exist' or 'do not assume anything — always ask for clarification' to a system or opening prompt measurably reduces confident fabrication. Commenters across threads independently recommend this addition to otherwise strong prompts.

[/r/LocalLLaMA/comments/1tjbhjk/same\\_task\\_in\\_githubcopilot\\_pi\\_claudecode\\_and\\_opencode\\_with\\_qwen3\\_6\\_27b/](https://news.ycombinator.com/item?id=44549209), <https://news.ycombinator.com/item?id=44549209>

*Test: Add the sentence 'Never assume facts not provided; if information is missing, ask a clarifying question before proceeding' to the top of your next system prompt and compare response accuracy and follow-up question rate against sessions without it.*
