

CLAIRE — Technique Candidates

Run date: 2026-07-19

Cross-platform workflow techniques surfaced this cycle. Test manually before considering any configuration change.

1. Constraint-Weighted Scoring Prompt [MEDIUM]

Users explicitly define hard constraints and weighted priorities upfront in a prompt before asking for recommendations or analysis. The AI then scores options against those weights and produces ranked results with sensitivity analysis, making reasoning traceable.

Source signal: <https://news.ycombinator.com/item?id=46955606>

Test: Before asking for a recommendation, write out your constraints (e.g., budget, must-have features) and assign explicit weights (e.g., portability: 40%, performance: 30%) and ask the AI to score each option against them.
